

# 8" – 84 Count Contractor Box

*Item Number: CSH8/84/300B*

**Box = 84 Shims**

**Pallet = 300 Boxes**

**Why is split resistant, easy to cut, and excellent snap important?** Contractors use shims for many applications and don't want to waste time trimming/cutting shims. Also, if a shim splits when securing with a screw/nail, the user has to re-shim the install.
